

Computing the sustain score from the tone-vibration area (TVA)

TVA₀ (no pedal)
area = 1.00

TVA₁ (pattern 1)
area = 1.59

TVA₂ (pattern 2)
area = 1.80

TVA = tone-vibration area (shaded). $TVA_0 \equiv 1.00$; score = TVA_n / TVA_0 .

Measured APEE means: $TVA_0 = 1.00$, $TVA_1/TVA_0 = 1.59$, $TVA_2/TVA_0 = 1.80$
